Yuvraj Kunwar

Project Lead Developer | Master's in IT (Cybersecurity) |
Cybersecurity & Full-Stack Development | Open to Graduate Roles
Balaclava, Victoria, Australia

Summary

I am currently pursuing a Master's in Information Technology (Cybersecurity) at the Victorian Institute of Technology, with a focus on cybersecurity, digital innovation, and applied industry projects. Alongside my studies, I am gaining hands-on development experience as a Project Lead Developer (Intern) at Dulcie Home Care, where I am building a proprietary invoicing portal integrating OCR/AI, Google Workspace, Lookout API, and Xero — replacing a third-party approval system end-to-end. My background bridges both technical and security domains, having previously worked as a SOC Analyst at eSewa Nepal with SIEM, SOAR, and IDS/IPS tools. I enjoy solving real-world problems through clean system design, API integration, and automation.

Experience

Dulcie Home Care
Full Stack Developer
March 2026 - Present (1 month)
Melbourne, VIC

Currently leading full stack development of a proprietary invoicing portal at Dulcie Home Care, replacing the third-party system ApprovalMax. Building an end-to-end pipeline using React.js and Node.js — covering automated invoice ingestion (Snapforms + email → Google Drive), OCR/AI data extraction, manual review workflows, and API integrations with Lookout and Xero for approval routing and automated payment processing.

Education

Victorian Institute of Technology (VIT)
Master's degree, Information Technology · (June 2025 - June 2026)

La Trobe University

Master's degree, Information Technology · (November 2024 - June 2025)

Nilai University

Bachelor's degree, Information Technology · (October 2019 - December 2023)
